To: The Broker's Workstation Users

Dear Valued Client:

Re: The Broker's Workstation – Important Releases and Changes

Custom Software Solutions Inc. (CSSI) is pleased to announce the release of the following enhancements and new features to its The Broker's Workstation product.

Production Report – A user will now have the ability to filter the production report based on the producer code on the folder or the producer code on the transaction.

Images – An “image” that is dropped onto a folder will now have a “save a copy” option button on the toolbar in the form of a diskette icon. A user can click the button, select a destination directory, enter a filename and TBW will make a copy of that “image” in that location. If you select an existing file it will ask if you want to overwrite it. You will not have to enter a file extension as the file will be saved based on its existing format (JPG, BMP, etc...).

The toolbar for the “Policy Images” tab will now also have a “save a copy” button that works the same as the description above for “images” attached to a policy.

Please run the TBW Remote Update Utility to access these changes. For assistance in using these new features, please contact our Support Team at 1-888-291-3588.

Please share this information with all TBW users in your office(s) and thank you for using TBW.

Yours truly,

Custom Software Solutions Inc.
