

Custom Software Solutions Inc. Integrates CSIO's My Proof of Insurance eDelivery

(Toronto – February 21, 2019) Custom Software Solutions Inc. (CSSI) has launched the integration of CSIO's My Proof of Insurance eDelivery solution within their products - The Broker's Workstation (TBW), The Underwriter's Workstation (TUW) and Intelliquote (IQ). As part of this integration, brokers will be able to securely send customers digital proof of auto insurance (eSlips) for personal and commercial lines without leaving their broker management system. Customers can store their eSlips in their digital wallets on their smartphones.

"As the Canadian insurance industry evolves with technology, we want to ensure we're empowering brokers to evolve along with it," says Scott Andrew, President and CEO of CSSI. "The integration of My Proof of Delivery enables brokers to work within one continuous workflow and serve their clients in a more efficient manner."

"We're pleased to work with CSSI and build on our partnership to offer brokers who use their products a streamlined workflow," says Catherina Smola, President and CEO of CSIO. "Brokers are eager to meet the demands of their clients to deliver superior customer service, and in turn, strengthen the broker-client relationship. My Proof of Insurance ensures that consumers' expectations of fast, easy and convenient digital interactions with their insurance provider are met."

CSSI joins many other software providers who have implemented the industry's eDelivery solution. For the full list of vendors who have integrations with My Proof of Insurance eDelivery, visit www.csio.com/edelivery.
