NEWS RELEASE

Custom Software Solutions Announces Integration to SGI Canada and Its Subsidiary Broker Websites

July 2009 – Virden, MB – Custom Software Solutions (CSSI) is pleased to announce the following expanded integration services to SGI Canada and its subsidiary websites (Coachman, ICPEI, and SGI Canada Insurance Services, Ltd.) through use of The Broker's Workstation (TBW) WebConnect tool.

WebConnect allows the TBW user to access various insurance company and service bureau websites quickly and easily directly from the TBW interface. With the broker websites, username, password, and policy number are automatically populated, streamlining workflows and allowing seamless access to information. Using TBW's WebConnect tool, the TBW user now has access to billing, policy, and claims inquiries, as well as the ability to revise a home or auto policy directly from policy inquiry on the broker website. In addition, the direct link to the broker website streamlines the process of accessing the most current forms, reports, wordings, and booklets.

CSSI continues to deliver to brokers optimal integration tools using its own industry leading I-Biz and WebConnect products. "We will deliver as many integration tools to our brokers as possible to streamline their workflow and eliminate duplicate processes," said Scott Andrew, CEO of Custom Software Solutions. "Despite the onset of individual Insurance Company processes we have not lost sight of creating a SEMCI environment for our Brokers. SGI Canada's willingness to integrate their websites with our products allows us to continue that vision."

About Custom Software Solutions
